Warehouse Management Solutions, Inc.

9708 W128th St Overland Park, KS 66213 Phone: 913-481-8749 Fax: 775-851-3996

WMSI designs, develops and supports **ShippingLIVE!**[®] a Shipping Execution System that far exceeds the capabilities, features, function and technology platform of any other system on the market.

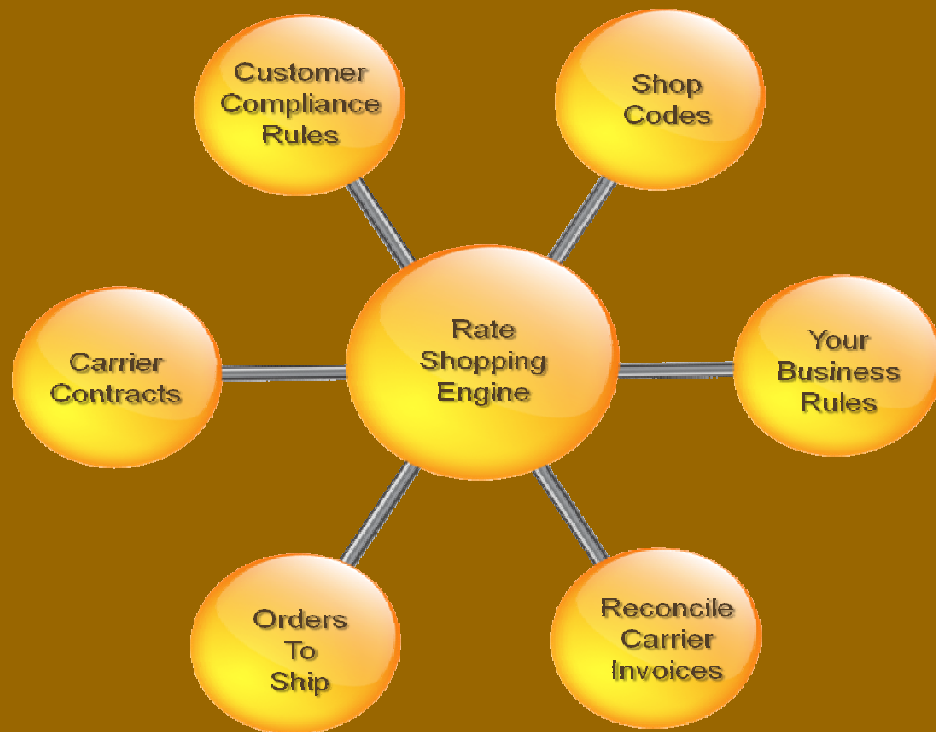

For over a decade WMSI has been providing supply chain consulting services to small and medium businesses in a wide range of industries. We work collaboratively with our clients to provide, strategy and business process consulting, supply chain technology selection and implementation, program, project and change management.

WMSI is made up of a core team of service professionals that have extensive supply chain consulting and implementation experience. We hire senior practitioners with a depth of experience that allow us to deliver more with fewer resources, Understand the needs of small and mid-market businesses, and are experienced with most tier 1 and tier 2 supply chain software applications

Our success in this market has been driven by our ability to offer solutions that are affordable for small and medium businesses, include a very specific scope, and add value to every dollar spent.

We are guided by the philosophy that business processes drive automation and technology needs. Thus, our goal in supply chain projects is not to see how much automation or software functionality we can fit into a project, but rather to see how we can use the automation and software to support simple yet highly efficient processes. In a **ShippingLIVE!**[®] project, or any project in which we engage our clients, we will leverage our experience in various environments to identify process improvement opportunities and system solutions that deliver value to your business.

ShippingLIVE!® is your Freight Spend Manager

Copyright © 2008-2009 Warehouse Management Solutions, Inc.

- Always get the best possible price for the shipment
- More work with fewer FTEs
- Fewer errors and charge backs
- Control of inbound shipping & best rates
- Real-time decision making
- Improve cash flow
- Always pay corrected invoices with auto-reconciliation
- Have the data to negotiate best rates with your carriers
- Fewer IT resources required
- Lower System Maintenance Costs

ShippingLIVE!® can save you money in shipping costs and efficiency gains, and that's money that goes directly to your bottom line!

The screenshot displays the ShippingLIVE! web application interface. On the left is a vertical navigation menu with options: Rate Shop, Shipping Forms, Ship Confirm, Master Manifest, End Of Day, Shipping History, Reconcile, Inbound Portal, and shippingLive!. The main content area is titled 'Ship Mode and Weight' and includes a 'Ship Code' dropdown set to 'Parcel-1 Day', 'Package #' set to '1', and 'Weight' of '12.56 lbs including packaging'. Below this are 'From' and 'To' address sections. The 'From' section lists: Site (Texas Site), Company (WMSI), Name (IVAN ECKERSON), Phone ((951)653-2669), Address1 (4204 KERN DR), Address2, City (RIVERSIDE), State (CA), Country (USA), Zip/Postal (92392), and Type of Business (Business with a dock or forklift). The 'To' section lists: Customer, Company (SUGAR SOFTWARE), Name (JOHN JACKSON), Phone ((815)854-7001), Address1 (1206 SUN VALLEY DR.), Address2, City (WICHITA FALLS), State (TX), Country (USA), Zip/Postal (76302), Reference, and Type of Business (Business with a dock or forklift). A 'Rate Shipment' button is located below the 'To' section. At the bottom, the 'LTL Shipment Details' section includes: Type of Package (New commercial goods), How is it packaged (Standard pallets), How many? (input field), Number of cartons (input field), Stackable? (checkbox), Freight class (50), and Dimensions in inches (optional) with input fields for Length, Width, and Height.

ShippingLIVE!® is the leading Shipping Management/Execution System on the market today, brought to you by the premier WMS services provider in the middle market, WMSI. **ShippingLIVE!®** was born out of WMSI's vast experience in warehouse operations and in working with our clients to solve the everyday problems experienced by the people on the warehouse floor and in the shipping department. A collaboration of warehouse and technology expertise coupled with the hands on knowledge of people who have spent their lives moving and shipping products produced **ShippingLIVE!®**.

The world class feature sets and robust and standard integration to most ERP systems from SAP Enterprise/B1, MAS200/500, MS Dynamics Suite, JDE, and many others, **ShippingLIVE!®** can dramatically save time and money in your shipping operations, customer service, and billing department. One-Click Rate Shopping Guarantees you get the least cost price for every shipment, both outbound and inbound. **ShippingLIVE!®** is also fully integrated with Accellos WMS Suite and High Jump WMS.

ShippingLIVE!® has a **“One-Click” Rate Shopping** mode that allows the user to select the ship mode needed; Parcel-1 Day, Least Cost, LTL, All Modes Least Cost (which will compare not only parcel carriers; UPS/FedEx/USPS, but also LTL/TL carriers to make sure you are shipping the least cost method). Rate shopping can also be automated based on ownership or management business rules, and the rate mode is predetermined by the embedded business rules engine. All modes of shipping are covered. Rate Shopping can also be available to your Customer Service Representatives, and or sales people in the field at your customer location to give on the spot rate quotes to your clients. Unlimited Shop Codes are available.

ShippingLIVE!®'s Ship Station Screen is the screen most used screen in the system and it's operation is extremely simple and fast, sub-second in most cases. Executing a shipment is as easy as entering an order number, or pallet number, or Customer ID, scaling the item if needed, and pressing the "Ship" button. At that point labels are printed, completed order data automatically sent to the ERP or WMS, labels put on the boxes and the order is ready to be picked up by the carrier. No complex process are needed. If changes are needed to the order, the user can navigate to the proper screen and make changes easily and quickly. Simplicity, speed and efficiency are the key tenants of **ShippingLIVE!®**. Rate shopping can also be fully automated with no human intervention.

UPS is a registered trademark of United Parcel Service of America Inc.
All Rights Reserved.

ShippingLIVE!®'s Ship Options screen allows the user to go deeper in the ship process if it is necessary due to incomplete information or other details that might be needed or need to be edited. Normally all of the information in this screen is populated from order entry or WMS. Ship Detail gives the user the ability to edit information if there is a need to make a change, add dimensions, declare a value, ship COD, add shipping charges, etc. If the information does not come down automatically, email addresses can be added for ship notification and other functions.

Options include: Packaging Type, Weight (which can be scaled or come from the system, Reference information, Carton ID, DIMs, declared value, additional handling, confirmation request. Service Types can be changed, Payment Information; Prepay and add, COD, etc. Labels can be sent to a secondary printer from here as well.

ShippingLIVE!®'s In-Bound Portal allows you to extend the Rate Shopping capability to your suppliers. This screen gives you the ability to control the costs of your inbound shipments. You can enforce your business rules upon your suppliers to make sure they ship every item exactly how you want it and at the least cost. Orders can be looked up by PO#, Item #, or Ship to ID. A list of valid orders will then be displayed. The users selects the order, hits rate shop, hits ship and all paper work is printed and the order is ready to ship, saving you money and giving you the ability to audit shipments from your suppliers with track trace information, etc.

ShippingLIVE!®'s Vendor Reconciliation Module is another area that is a substantial payback for companies. Many companies spend numerous hours every week/month reconciling charges from carriers. This function can be done automatically comparing the estimated shipping costs at the time of shipping with the actual from the carrier. A variance report will be generated showing discrepancies between the two amounts. This process can be completely automated and sent to your accounting system for processing.

ShippingLIVE!®'s LTL Ship Processing Screen allows the shipper to indicate the particulars for a given LTL shipment. Specifics include order and address information, Business Type, Package Type, Packaging, Quantity, Class, Weight, DIMS, Special Services needed, HAZMAT, Rate, etc. In general most of this data can be auto populated from the ERP or WMS. Manual Rate Override is also an option if needed. Once completed click ship and the BOL is printed, and the order processes and is reported up to the WMS or ERP.
